

SS HORIZONTAL BAND SEALER MACHINE

Product Details

APS have variety of band sealing machines, which is designed as Industrial-grade machines for light to heavy duty continuous bag sealing applications. APS Band sealers are suitable for bags made with thermoplastic materials including Polyethylene (PE), Polypropylene (PP) and heat-sealable laminations even it works for sealing Laminated Papers. Capable of sealing a wide range of bags such as standy pouches, gusseted bags, pillow-type bags, sachets, barriers bags, etc.

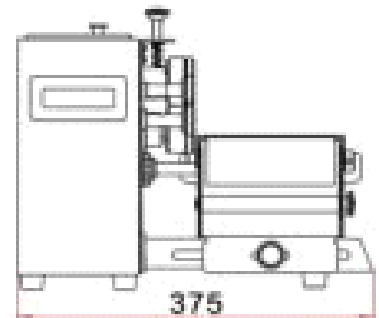

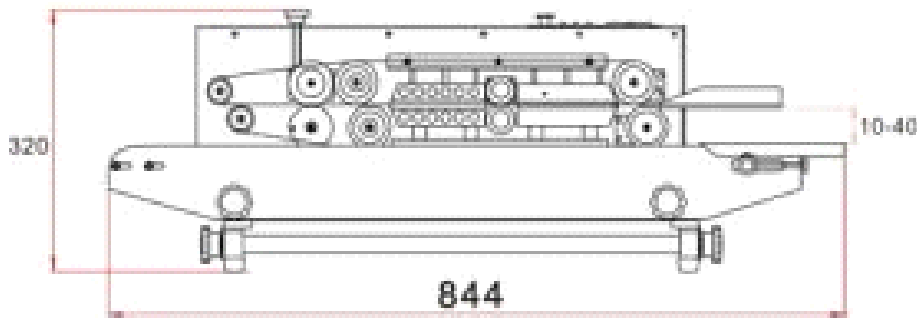

One unique feature of the APS Band Sealer Machine is that they can be converted for both horizontal and vertical operation, a desirable feature that makes irrelevant the flow characteristics of the product being packaged. These are truly universal bag sealing machines designed to work for most entry-level continuous bag sealing applications

SPECIFICATIONS

Model	APS-033-BS-SSHDH
Sealing Width	8mm to 12mm
Power Required	220V/50-60Hz Signal Phase 500 W
Speed	10 to 15 Pouches/minin
Loading Capacity	Up to 1 kg
Gear Quality	Metal gear
Machine Weight	20 Kg
Packaging Material	PE Lam inated, Aluminium Pouch PP, LD
