AUTOMATIC INDUCTION SEALING MACHINE

Product Details

The sealing is an important process in packaging. It helps producers to maintain product integrity that enhances the trust of consumers. It also benefits consumer to get the genuine products without any sort of adulteration and pilferage. In short, it boosts brand value of products and customer satisfaction. The seal promotes clean and safe transportation of products as it prevents chances of leakage. Thus, it helps in protecting and increasing the shelf life of the content in containers.

Special Features :

- Perfect for High speed sealing
- Easy operation
- Only one man power required.
- Low electrical power consumption
- Adjustable Induction head for various height of product
- Can be used for wide range of sizes of Bottles / Jar.
- Hygienic, easy and fast sealing.
- Sealing with out wrinkles, leakage-proof.
- Don't damages the bottle / jar surface

SPECIFICATIONS

Working Frequency	75-85KHz
Power Required	220v/ -50Hz
Power Consumption	1.5 KW
Conveyor Speed	Adjustable 0-15mtrs/ min
Sealing Diameter	20 -120mm
Bottle Height	Adjustable from 20- 350mm
Machine dimensions	2000 x550 x450mm
Machine Weight	150 Kg
Cooling Systems	3 cooler fans
Load bearing capacity	20 Kgs
Material of Construction	SS 304
